CLEAR Spot™ Firmware Update Guide

Welcome!

Update your **CLEAR** Spot to the latest available firmware by following these steps:

1. Make sure your **Clear** USB modem has been activated via your PC by following the instructions that come with your **Clear** USB modem.
2. Once connected to the internet go to www.clear.com/support and download the latest firmware file and modem driver file (if available) for the **CLEAR** Spot. Save both files to your PC's hard drive.
3. Follow the instructions in your **CLEAR** Spot **"Quick Start Guide"** to connect your computer to your **CLEAR** Spot via Wi-Fi, however note that in some cases the WiMAX modem may not yet function in the **CLEAR** Spot until the newest firmware update and modem driver files are installed.
4. Once your PC is connected to the **CLEAR** Spot, enter the following address in your browser's address bar, which will take you to the **CLEAR** Spot setup utility: <http://192.168.0.1>. If prompted for a password use the password found on the bottom of your **CLEAR** Spot. In the **CLEAR** Spot setup utility click on the **"Tools"** tab, then the **"Firmware"** section (under Tools on the left side).
5. On the Firmware page, first update your **CLEAR** Spot router firmware file by clicking the **"browse"** button under **"Manually Upgrade Router Firmware,"** then locate the firmware file named **"u_cphs_2010_05_28.bin"** which you downloaded to your PC in step 2 above. Once selected, click the **"Upload"** button below it. The **CLEAR** Spot will install the new firmware file and reboot the device.
6. Repeat this process to install the new modem driver file named **"u_modem_v5.2.8.bin"** (if available), using the **"Manually Upgrade Modem driver file"** section of the Firmware page.

Once this is complete you can plug your **Clear** USB modem into the **CLEAR** Spot and resume using it, following the instructions in your **Clear** USB modem and **CLEAR** Spot documentation.

Congratulations! Your **CLEAR** Spot is now up to date with the latest available firmware and ready to use with your **CLEAR** Mobile Internet service.
